

Non-Chlorinated Brake Parts Cleaner

(March 2022 edition)

AMALIE Non-Chlorinated Brake Parts Cleaner is manufactured with high-quality components and uses low-volatile organic compound (VOC) chemicals to remove brake fluid, grease, oil and other contaminant from brake lining and drums. It cleans and degreases brake linings, drums, cylinders, springs, disc brake pads, and other related brake parts. The **AMALIE Non-Chlorinated Brake Parts Cleaner** is safe for all types of brake systems and will help improve brake performance.

Benefits

- Leaves No Residue
- Non-Chlorinated and Low-VOC Formula
- Removes Grease, Oil, Dust and Dirt
- Dries Quickly
- Quiets Brake Noise Due to Brake Dust Build Up
- Safe for Use on ABS, Disc, and Drum Brakes

Directions for Use:

Shake well prior to use.

To remove brake fluid, grease, oil and other contaminants, spray brake parts liberally with the **AMALIE Non-Chlorinated Brake Parts Cleaner** and allow to run off. Air dry or dry with soft cloth. Repeat application as necessary. This can be applied without disassembling the brake unit.

Use in well-ventilated areas or outdoors and away from open flames. Protect rubber, painted surfaces and plastic from overspray.
