

## Rust Prevention Fluids

(September 2021 edition)

**AMALIE Rust Prevention Fluids** are formulated for use in applications requiring a robust and effective level of protection that may be applied by brush, roller, dip or spray. This fluid contains various chemical additives that will prevent corrosion and yellow staining on sheet metal and will prevent the formation of white rust on galvanized steel. **AMALIE Rust Prevention Fluids** are available in two grades, light and medium. The **AMALIE Rust Prevention Fluid – Light** offers faster penetration and has a low flash point. The **AMALIE Rust Prevention Fluid – Medium** will give a more stable protective film, which is suitable for protecting surfaces for longer periods of time.

### Benefits

- Provides Surface Protection for Extended Periods of Time
- Outstanding Protection Against Rust
- Good Dewatering Properties
- Can be Applied in a Variety of Ways

### Typical Physical and Chemical Properties

AMALIE Rust Prevention Fluid	Light	Medium
ISO Viscosity Grade	15	22
API Gravity	34.0	34.5
Flash Point, °C	170	200
<b>Kinematic Viscosity</b>		
@ 100°C, cSt	3.5	4
@ 40°C, cSt	14	20
Viscosity Index	100	100
Pour Point, °C	-15	-15

### Health and Safety

Safety Data Sheets (SDS) are available online at [AMALIE.com](http://AMALIE.com) or from your AMALIE Representative.
